Amended July Quarterly Report

Details on line 11a (Individuals) and 11b (Political Party Committees) appear incorrect

In response to your notice, I have reviewed our records and filed reports and have found the following.

We have received 2 contributions from Town of Clinton Womens Republican Club. The first contribution was received on November 9, 2010 and was reported on the 2010 post-election report as a contribution from a political party committee. A second contribution was received from this organization on July 17, 2012. At the time of the second contribution, it was discovered that the organization was coded as a political party within our campaign software. We determined this was an error and changed the coding of this contributor to organization but not a PAC or political party committee. I did not realize that a previous contribution had been made, and therefore, the cycle-to-date totals were now incorrect. Because of the timing of the receipt of the second contribution and the filing of the amended July Quarterly , the Amended July Quarterly report is actually reflecting the correct cycle-to-date total for political party committees and individuals. In order to correct the cycle-to-date totals, the reports filed prior to the July 2012 contribution have to be amended.

In addition, because we are classifying Town of Clinton Womens Republican Club an organization, we have verified that permissible funds were available for us to accept their contribution.
